

WASHINGTON, DC – Congressman Robert C. "Bobby" Scott (D-VA-03) released the following statement in response to President Obama's State of the Union Address to a joint session of Congress:

"Our economy has added a total of 3.2 million private sector jobs over the last 22 months, but the President and Congressional Democrats realize that we must do more to create jobs and accelerate our economic recovery. The wealthiest Americans have seen their bank accounts and stock portfolios continue to grow despite the economy, while too many American families have seen declining housing values, their incomes eroded, and are struggling to make ends meet in the wake of the deepest recession since the Great Depression.

"Tonight, I believe the President laid out a strong blueprint that will ensure the long term success of our economy and better address economic inequality by calling for a greater emphasis on American manufacturing, American energy, and investment in the skills and competitiveness of the American workforce."
